

A: Healthy Aging Multiple and B: Skin Beautification

Nutritional Supplement

Healthy Aging Multiple - 60 capsules / Skin Beautification - 60 softgels (combination pack)

Healthy Beauty Begins Within™

This formula is ideally suited for those seeking a multiple focused on a more healthy and moderated aging process combined with a skin beautifying formula.

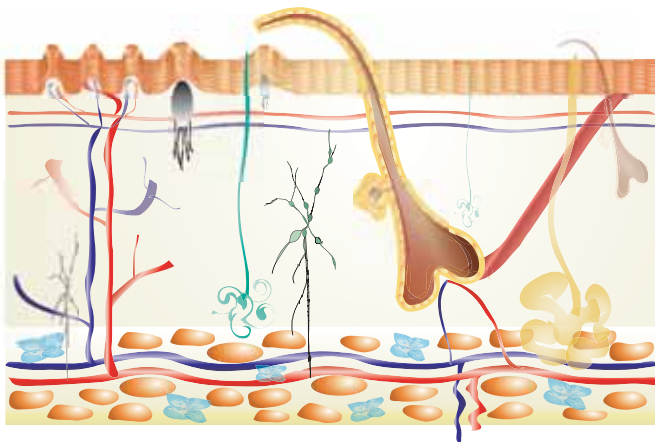

A: Purpose of Aging Formula

Healthy Aging Multiple is both a healthy aging product and a multi vitamin/mineral. All of the systems and organs of the body are subject to aging beginning at the cellular level. If you are serious about slowing the aging process you need basic nutrients combined with targeted nutrients that help inhibit accelerated aging.

B: Purpose of Skin Formula

Beautifully healthy skin depends on:

1. Moisture - hyaluronic acid and cranberry seed oil work together to help hydrate and soften skin and retain moisture and structure.
2. Protection - powerful antioxidants fight dangerous chemical reactions that create damaging free radicals in a process called oxidation. These antioxidants also help eliminate waste.
3. Nourishment - this formula helps create pathways that allow the body to transport the nutrients to the outer layers of the skin. It also helps regulate the life cycle of skin cells.

Key Active Ingredients

- **Total Antioxidant System** - works synergistically to protect the skin from internal and external free radical damage. Vitamins A, C and E, along with alpha lipoic acid and selenium, are strengthened by natural tocotrienols, lycopene, lutein and a carotene complex in support of skin, eye and cardiovascular health.
- **Cranberry Seed Oil** - a superb skin nutrient. It has the highest tocotrienol content of any botanical oil and naturally contains an almost perfect balance of omega 3, 6 and 9 fatty acids.
- **Injuv™ Hyaluronic Acid† (HA)** - one of nature's most versatile substances. It enables cells in the dermis and epidermis to retain moisture by providing nourishment directly at the cellular level.
- **Diindolylmethane (DIM)** - naturally occurring in cruciferous vegetables, like broccoli and cauliflower. Studies suggest it supports the body's natural detoxification processes and helps maintain normal metabolism by helping to balance male and female hormone levels.
- **Green Tea Extract** - promotes a healthy metabolism and the burning of fat for energy.
- **Rhodiola Extract** - supports a healthy capacity for physical and mental performance. It may also bolster the body's natural defenses.
- **Digestive Enzyme Complex** - a full spectrum enzyme complex scientifically designed to optimize digestion and nutrient availability.
- **Gamma Tocopherol** - part of the Vitamin E family. Recent studies suggest this nutrient plays a vital role in protecting skin cells.
- **Grape Seed Extract** - The active ingredients in Grape Seed Extract (Proanthocyanidins) inhibit the enzymatic breakdown of collagen, elastin and hyaluronic acid to strengthen blood vessel walls, including capillaries. This helps red blood cells penetrate into the microcirculatory system and prevent fluids from leaking out of the capillaries. As a powerful antioxidant it helps prevent oxidative damage to blood plasma and lipids.
